PROJECT OVERVIEW – GARAGE MANAGEMENT SYSTEM

1. Project Title

Garage Management System (GMS)

2. Project Objective

The objective of this project is to design and implement a system that streamlines daily garage operations. It helps manage customer details, vehicle records, service bookings, spare parts inventory, billing, and employee tasks, ensuring efficiency, accuracy, and better customer satisfaction.

3. Project Scope

The system will:

- Store customer and vehicle details in a centralized database.
- Allow booking of vehicle servicing and repairs.
- Track the status of vehicles (in-progress, completed, delivered).

- Manage spare parts inventory (stock availability, usage, reordering).
- Generate invoices and maintain payment records.
- Provide reporting and analytics (e.g., revenue, most-used services, pending jobs).

4. Key Features

- **Customer Management** – Add/update customer details and history.
- **Vehicle Management** – Record vehicle details (type, model, registration number, etc.).
- **Service Management** – Schedule and track service/repair jobs.
- **Inventory Management** – Maintain stock of spare parts and consumables.
- **Billing System** – Auto-generate bills and track payments.
- **User Management** – Different access levels (Admin, Mechanic, Receptionist, etc.).
- **Reports & Analytics** – Service history, revenue reports, parts usage, etc.

5. Users of the System

- **Garage Owner / Admin** – Full access and management.
- **Mechanics / Technicians** – Access assigned service jobs and update status.
- **Receptionist / Front Desk Staff** – Manage bookings, customer communication, and billing.
- **Customers (optional via portal/mobile app)** – Book services and check status.

6. Benefits

- Streamlined garage operations with reduced manual paperwork.
- Faster service booking and processing.
- Accurate billing and inventory control.
- Improved customer experience and trust.
- Data-driven decision making through reports.

7. Technology Stack (example)

- **Frontend:** HTML, CSS, JavaScript / React
- **Backend:** Java / Python / Node.js / PHP

- **Database:** MySQL / PostgreSQL / MongoDB
- **Deployment:** Cloud or On-premises
- **Optional:** Mobile App (Android/iOS)

8. Deliverables

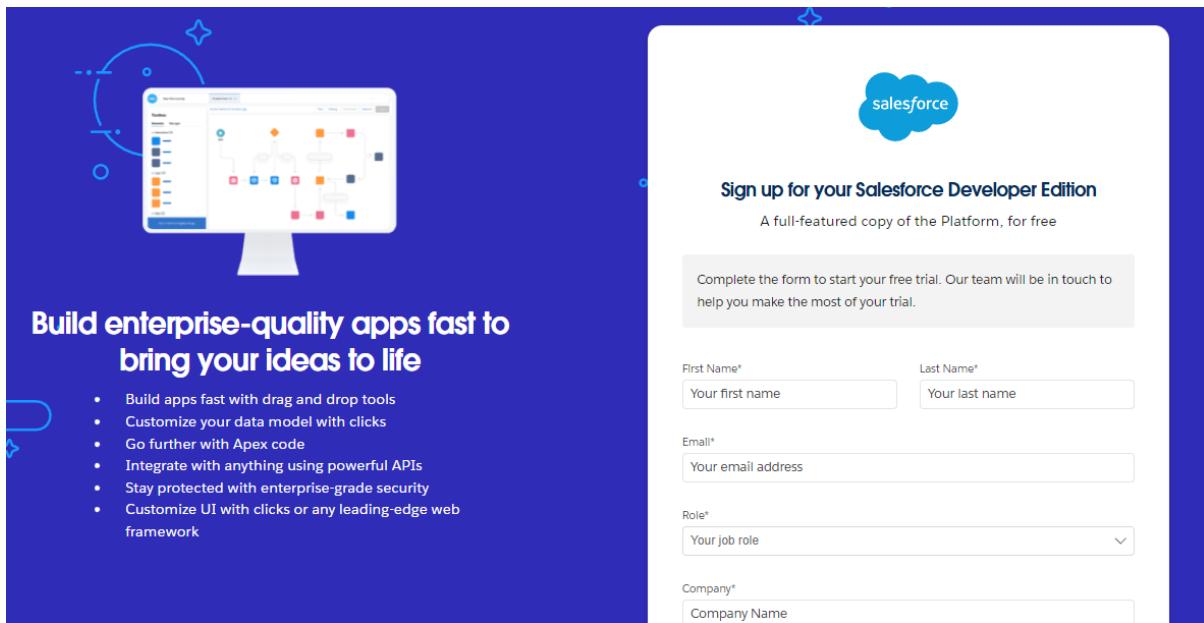

- A functional Garage Management System application.
- User documentation and training guide.
- Test cases and reports.
- Deployment and maintenance plan.

MILESTONE 1: SALESFORCE

ACTIVITY 1: CREATING DEVELOPER ACCOUNT

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details:

1. First name & Last name
2. Email
3. Role: Developer

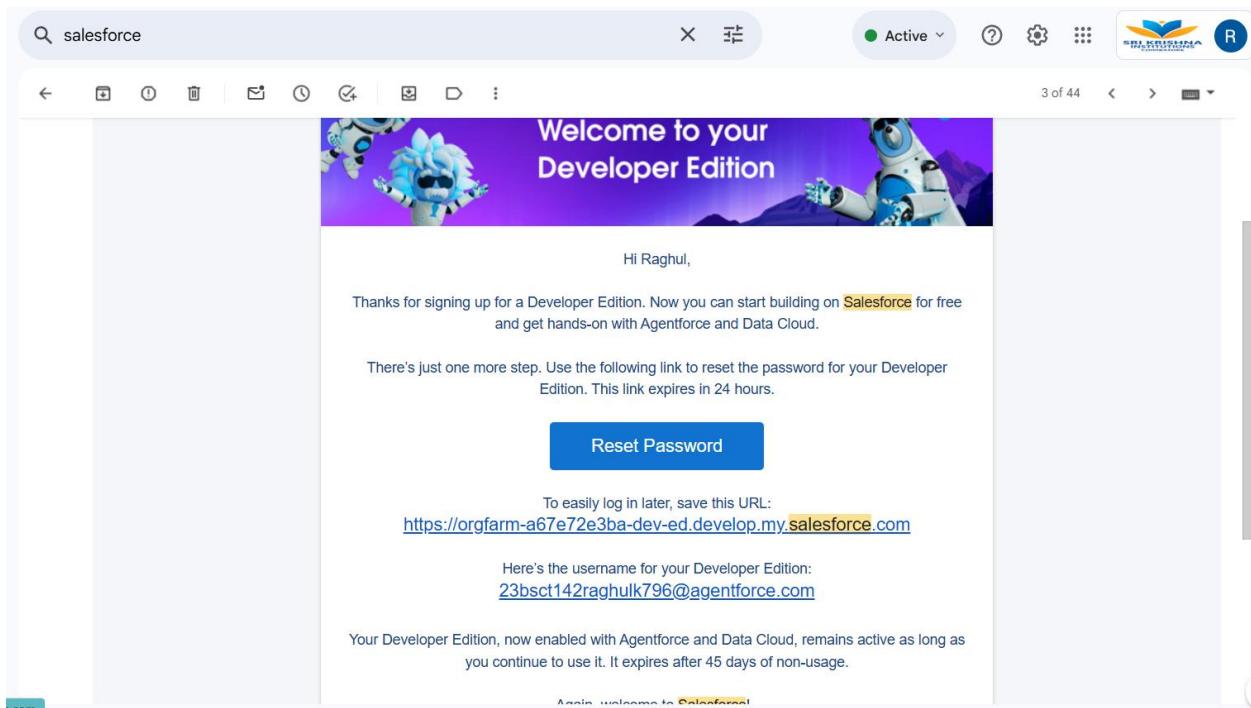

4. Company: College Name
5. County: India
6. Postal Code: pin code
7. Username: should be a combination of your name and company

This need not be an actual email id,
you can give anything in the format: username@organization.com

Click on sign me up after filling these.

ACTIVITY 2: ACCOUNT ACTIVATION

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **lead@sb.oom**.
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password
 Good

* Confirm New Password
 Match

Security Question
▼ In what city were you born?

* Answer
 asdfghjkl

Change Password

4. Then you will redirect to your salesforce setup page.

The screenshot shows the Salesforce Setup Home page. The left sidebar contains navigation links such as Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and Administration. The main content area features a "SETUP Home" section with three cards: "Get Started with Einstein Bots" (Launch an AI-powered bot to automate your digital connections), "Mobile Publisher" (Use the Mobile Publisher to create your own branded mobile app), and "Real-time Collaborative Docs" (Transform productivity with collaborative docs, spreadsheets, and slides inside Salesforce). A "Create" button is located in the top right corner of the main content area.

MILESTONE 2: OBJECT

ACTIVITY 1: Create Customer Details Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Customer Details
2. Plural label name >> Customer Details
3. Enter Record Name Label and Format
 - Record Name >> Customer Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

ACTIVITY 2: Create Appointment Object

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Appointment
2. Plural label name >> Appointments
3. Enter Record Name Label and Format
 - Record Name >> Appointment Name
 - Data Type >> Auto Number
 - Display Format >> app-{000}
 - Starting number >> 1
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

ACTIVITY 3: CREATE SERVICE RECORD OBJECT

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Service records
2. Plural label name >> Service records
3. Enter Record Name Label and Format
 - Record Name >>Service records Name
 - Data Type >> Auto Number
 - Display Format >> ser-{000}
 - Starting number >> 1
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

ACTIVITY 4: Create Billing details and feedback Object

To create an object:

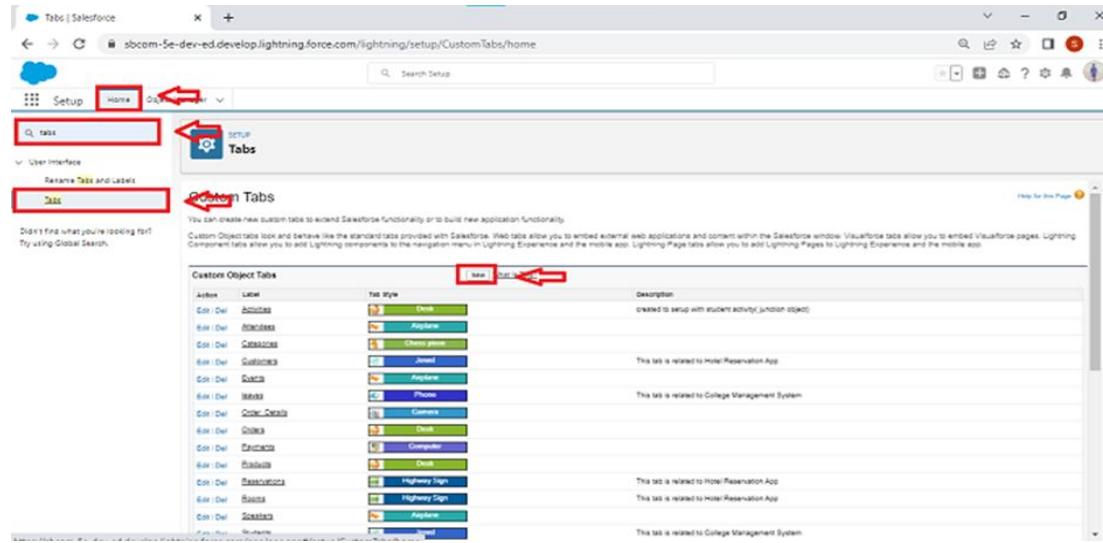

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
1. Enter the label name >> Billing details and feedback
2. Plural label name >> Billing details and feedback
3. Enter Record Name Label and Format
 - Record Name >> Billing details and feedback Name
 - Data Type >> Auto Number
 - Display Format >> bill-{000}
 - Starting number >> 1
2. Click on Allow reports and Track Field History,
3. Allow search >> Save.

MILESTONE 3: TABS

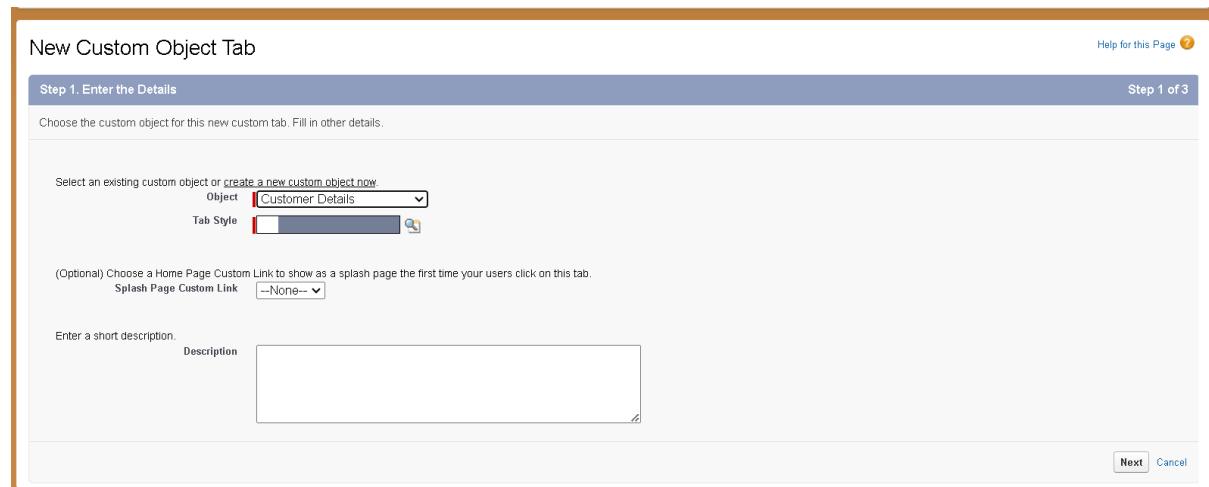

ACTIVITY 1: CREATING A CUSTOM TAB

To create a Tab: (Customer Details)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

2. Select Object (Customer Details) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab.
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.

New Custom Object Tab

Step 1. Enter the Details Step 1 of 3

Choose the custom object for this new custom tab. Fill in other details.

Select an existing custom object or [create a new custom object now](#).

Object: Customer Details

Tab Style:

(Optional) Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab.

Splash Page Custom Link: None

Enter a short description.

Description:

Next Cancel

Tab Style Selector

Create your own style

Hide styles which are used on other tabs

	Airplane		Alarm clock		Apple		Balls
	Bank[1]		Bell		Big top		Boat[1]
	Books		Bottle		Box		Bridge
	Building		Building Block		Caduceus		Camera
	Can		Car		Castle		CD/DVD
	Cell phone		Chalkboard		Chess piece		Chip
	Circle		Compass		Computer		Credit card
	CRT TV		Cup		Desk[1]		Diamond

	Hammer		Hands		Handsaw		Headset
	Heart[1]		Helicopter		Hexagon		Highway Sign
	Hot Air Balloon		Insect		IP Phone		Jewel
	Keys		Laptop		Leaf		Lightning

Save **Cancel**

Step 3. Add to Custom Apps

Step 3 of 3

Choose the custom apps for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each Custom App.

Custom App	<input type="checkbox"/> Include Tab
Platform (standard_Platform)	<input type="checkbox"/>
Sales (standard_Sales)	<input type="checkbox"/>
Service (standard_Service)	<input type="checkbox"/>
Marketing (standard_Marketing)	<input type="checkbox"/>
Sample Console (standard_ServiceConsole)	<input type="checkbox"/>
High Volume Customer Portal User	<input type="checkbox"/>
Authenticated Website User	<input type="checkbox"/>
App Launcher (standard_AppLauncher)	<input type="checkbox"/>

Analytics Studio (standard_Insights)	<input type="checkbox"/>
Sales Console (standard_LightningSalesConsole)	<input type="checkbox"/>
Service Console (standard_LightningService)	<input type="checkbox"/>
Sales (standard_LightningSales)	<input type="checkbox"/>
Lightning Usage App (standard_LightningInstrumentation)	<input type="checkbox"/>
Digital Experiences (standard_SalesforceCMS)	<input type="checkbox"/>
Queue Management (standard_QueueManagement)	<input type="checkbox"/>
Bot Solutions (standard_LightningBot)	<input type="checkbox"/>
Data Manager (standard_DataManager)	<input type="checkbox"/>
Salesforce Scheduler Setup (standard_LightningScheduler)	<input type="checkbox"/>

Append tab to users' existing personal customizations

Previous **Save** **Cancel**

ACTIVITY 2: CREATING REMAINING TABS

1. Now create the Tabs for the remaining Objects, they are “Appointments, Service records, Billing details and feedback”.
2. Follow the same steps as mentioned in Activity -1.

MILESTONE 4: THE LIGHTING APP

ACTIVITY 1: CREATE A LIGHTNING APP

To create a lightning app page:

1. Go to setup page >> search “app manager” in quick find >> select “app manager” >> click on New lightning App.

The screenshot shows the Salesforce App Manager interface. At the top, there is a search bar with 'Search Setup' and a 'New' button. Below the search bar, there are tabs for 'Setup', 'Home', and 'Object Manager'. A red box highlights the 'Q: app manager' search term. Another red box highlights the 'New Lightning App' button in the top right corner of the main content area. A third red box highlights the 'Clone Apps(Beta)' link below the search bar. The main content area displays a table of existing apps, with the first few rows listed below:

App Name	Developer Name	Description	Last Modified	Type
1 All Tabs	AllTabSet	Build CRM Analytics dashboards and apps	04/12/2022, 10:13 am	Classic
2 Analytics Studio	Insights	Build CRM Analytics dashboards and apps	04/12/2022, 10:13 am	Classic
3 App Launcher	AppLauncher	App Launcher tabs	04/12/2022, 10:13 am	Classic
4 Box Solutions	LightningBox	Discover and manage business solutions designed for your industry	04/12/2022, 10:18 am	Lightning
5 Chatter Desktop	Chatter/Desktop	Chatter Desktop is an Adobe AIR-based desktop application that lets Chatter users stay connected...	29/12/2022, 4:04 pm	Connected (Varaged)
6 Chatter Mobile for BlackBerry	Chatter/for BlackBerry	The Salesforce.com Chatter Mobile app lets you access Chatter data on the go. Use it to view fe...	29/12/2022, 4:05 pm	Connected (Varaged)
7 College Management System	Nadeem	demo app	08/12/2022, 4:18 pm	Lightning
8 Community	Community	Salesforce CRM Communities	04/12/2022, 10:13 am	Classic
9 Content	Content	Salesforce CRM Content	04/12/2022, 10:13 am	Classic
10 Data Manager	DataManager	Use Data Manager to view limits, monitor usage, and manage recipes	04/12/2022, 10:13 am	Lightning

2. Fill the app name in app details as Garage Management Application >> Next >> (App option page) keep it as default >> Next >> (Utility Items) keep it as default >> Next.

New Lightning App

App Details & Branding

Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.

App Details

- * App Name
- * Developer Name
- Description

App Branding

- Image
- Primary Color Hex Value

Org Theme Options Use the app's image and color instead of the org's custom theme

App Launcher Preview

App Name: Name your app... Primary Color: #0070D2

Next

3. To Add Navigation Items:

New Lightning App

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

Available Items

- Accounts
- Activities
- Alert Settings
- All Sites
- Alternative Payment Methods
- App Launcher
- Appointment Invitations

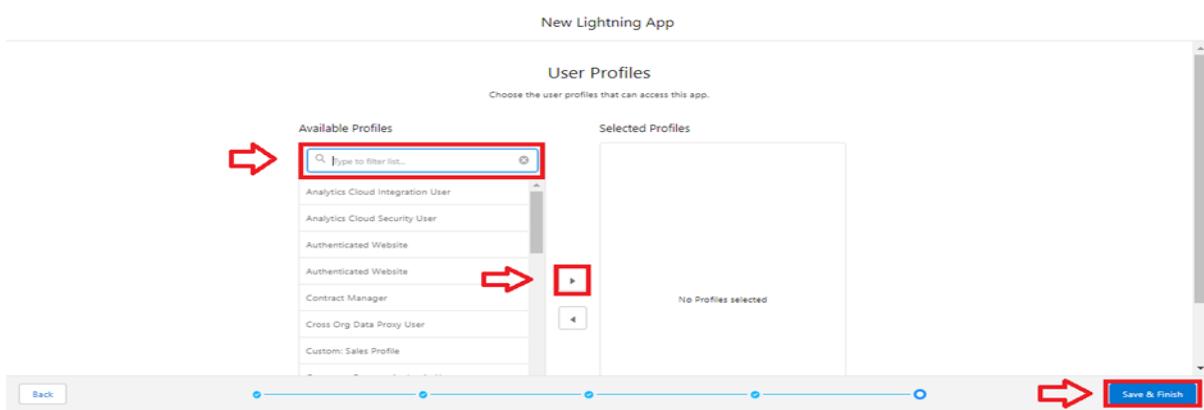

Selected Items

No items selected

Back

4. Select the items (Customer Details, Appointments, Service records, Billing details and feedback, Reports and Dashboards) from the search bar and move it using the arrow button>> Next.

5. To Add User Profiles:

Search profiles (System administrator) in the search bar >> click on the arrow button >> save & finish.

MILESTONE 5: FIELDS

ACTIVITY 1: Creation of fields for the Customer Details object

. To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Customer Details) in search bar >> click on the object.

Object Manager					
LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Customer	Customer	Standard Object			
Customer Details	Customer_Details__c	Custom Object		05/10/2023	✓

2. Now click on “Fields & Relationships” >> New

Customer1

Fields & Relationships

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Created By	CreatedById	Lookup(User)		
current Status	current_Status__c	Picklist		
Customer Name	Name	Text(80)		✓
Email id	Email_id__c	Email (Unique)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓
Permanent Address	Permanent_Address__c	Text Area(255)		
Phone no	Phone_no__c	Phone		

3. Select Data Type as a “Phone”

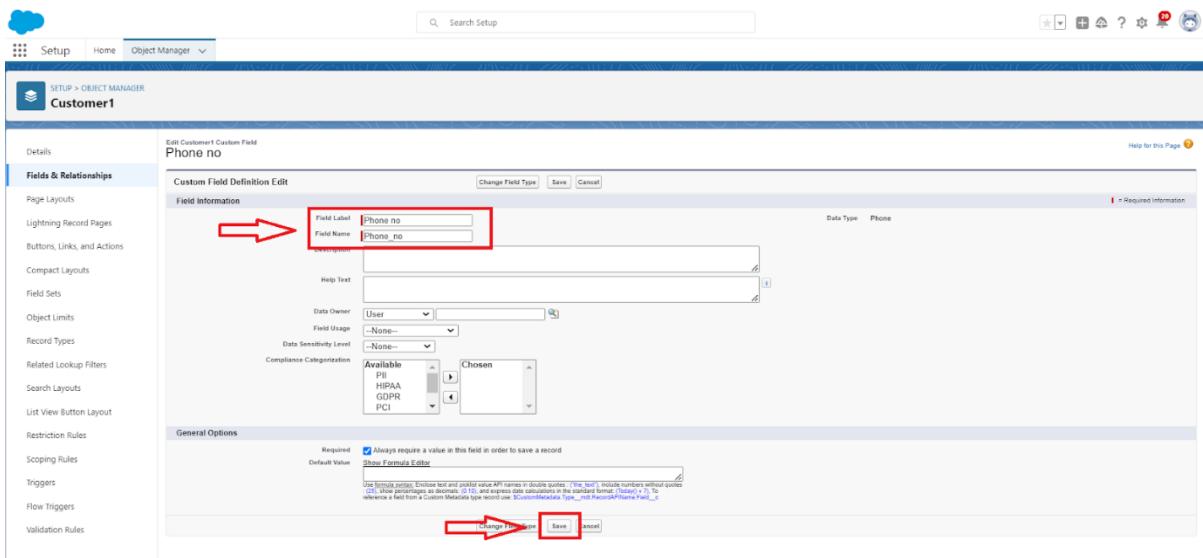

Customer1

Fields & Relationships

- Currency
- Date
- Date/Time
- Email
- Geolocation
- Number
- Percent
- Phone
- Picklist
- Picklist (Multi-Select)
- Text
- Text Area
- Text Area (Long)
- Text Area (Rich)
- Text (Encrypted) (1)
- Time
- URL

Allows users to enter a phone number. Automatically formats it as a phone number.

4. Click on next.

5. Fill the Above as following:

- Field Label: Phone number
- Field Name: gets auto generated
- Click on Next >> Next >> Save and new.

Note: Follow the above steps for the remaining field for the same object.

2. To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name (Customer Details) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Email” and Click on Next
4. Fill the Above as following:
 - Field Label: Gmail
 - Field Name: gets auto generated
 - Click on Next >> Next >> Save and new.

ACTIVITY 2: Creation of Lookup Fields

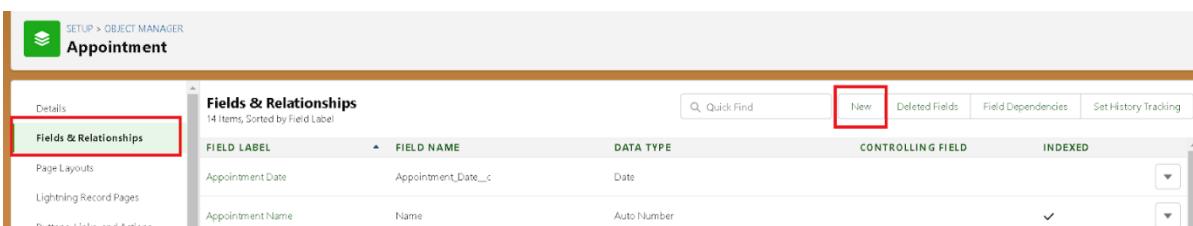

Creation of Lookup Field on Appointment Object:

1. Go to setup >> click on Object Manager >> type object name (Appointment) in the search bar >> click on the object.

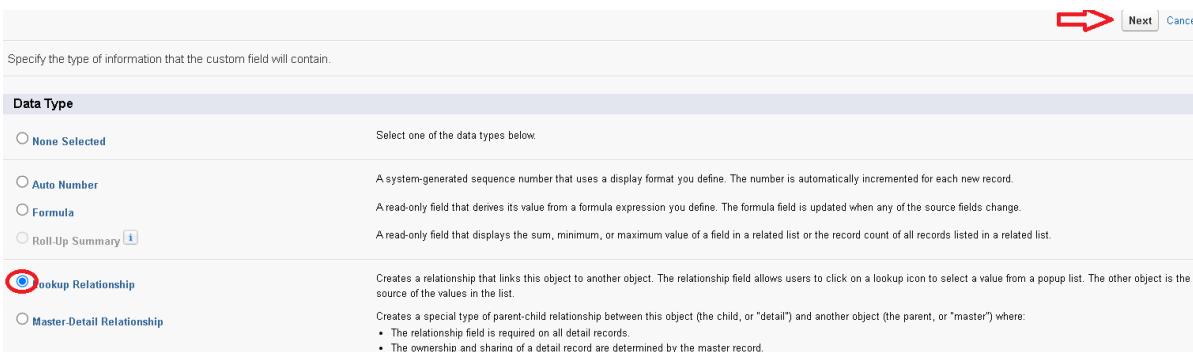

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar at the top right contains the text 'app'. Below the search bar are buttons for 'Schema Builder' and 'Create'. The main area displays a table with columns: 'LABEL', 'API NAME', 'TYPE', 'DESCRIPTION', 'LAST MODIFIED', and 'DEPLOYED'. There are five rows in the table. The first row, 'Appointment', has its entire row highlighted with a red box. The second row is 'Appointment Category', the third is 'Appointment Invitation', and the fourth is 'Appointment Invitee'. The fifth row is partially visible. The 'DEPLOYED' column for the first row shows a checkmark.

2. Now click on “Fields & Relationships” >> New

The screenshot shows the 'Fields & Relationships' page for the 'Appointment' object. The top navigation bar shows 'SETUP > OBJECT MANAGER' and the object name 'Appointment'. On the left, there are tabs for 'Details', 'Fields & Relationships' (which is selected and highlighted with a red box), 'Page Layouts', and 'Lightning Record Pages'. The main area lists fields under 'Fields & Relationships'. The first field listed is 'Appointment Date' with the API name 'Appointment_Date__c' and data type 'Date'. The second field is 'Appointment Name' with the API name 'Name' and data type 'Auto Number'. At the top right of this section are buttons for 'New' (highlighted with a red box), 'Deleted Fields', 'Field Dependencies', and 'Set History Tracking'. Below the table are 'CONTROLLING FIELD' and 'INDEXED' columns.

3. Select “Look-up relationship” as data type and click Next.

The screenshot shows the 'Data Type' selection screen. At the top right, there is a red arrow pointing to the 'Next' button. The screen asks 'Specify the type of information that the custom field will contain.' Below this, there is a table with columns for 'Data Type' and a detailed description. The 'Data Type' column contains radio buttons for 'None Selected', 'Auto Number', 'Formula', 'Roll-Up Summary', 'Lookup Relationship' (which is selected and highlighted with a red circle), and 'Master-Detail Relationship'. The 'None Selected' row has a note: 'Select one of the data types below.' The 'Auto Number' row notes: 'A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.' The 'Formula' row notes: 'A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.' The 'Roll-Up Summary' row notes: 'A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.' The 'Lookup Relationship' row notes: 'Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.' The 'Master-Detail Relationship' row notes: 'Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.

'

4. Select the related object “Customer Details” and click next.

5. Next >> Next >> Save.

Note: Make sure you complete Activity 4 Before continuing.

Creation of Lookup Field on Service records Object:

1. Go to setup >> click on Object Manager >> type object name (Service records) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New

3. Select “Look-up relationship” as data type and click Next.
4. Select the related object “Appointment” and click next.
5. Make it a required field so click on Required.

Lookup Options

Related To: Appointment

Child Relationship Name: Service_records

Related List Label: Service records

Required: Always require a value in this field in order to save a record

What to do if the lookup record is deleted?

- Clear the value of this field. You can't choose this option if you make this field required.
- Don't allow deletion of the lookup record that's part of a lookup relationship.

6. Scroll down for Lookup Filter and click on Show filter settings.
7. Now add the filter criteria.
8. Field: Appointment: Appointment Date >> Operator: less than >> select field >> Appointment: Created Date
9. Filter type should be Required.

Lookup Filter

Optional, create a filter to limit the records available to users in the lookup field. [Tell me more!](#)

[Hide Filter Settings](#)

Filter Criteria [Insert Suggested Criteria](#)

Field	Operator	Value / Field
Appointment: Appointment Date	less than	Field: Appointment: Created Date

Add [Begin typing to search for a field...](#) [None](#) [Value](#) [Clear](#)

[Add Filter Logic...](#)

Filter Type **Required.** The user-entered value must match filter criteria.
If it doesn't, display this error message on save:
Value does not exist or does not match filter criteria.

Optional. The user can remove the filter or enter values that don't match criteria.

Lookup Window Text Add this informational message to the lookup window.

Active Enable this filter.

[Change Field Type](#) [Save](#) [Cancel](#)

10. Error Message: Value does not match the criteria.
11. Enable the filter by click on Active.
12. Next >> Next >> Save.

Creation of Lookup Field on Billing details and feedback Object:

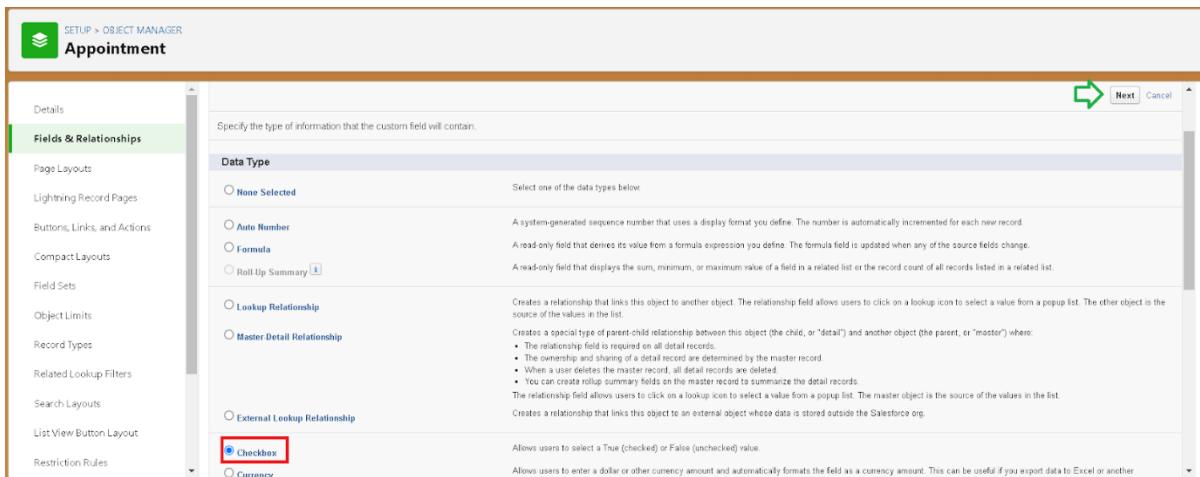

1. Go to setup >> click on Object Manager >> type object name (Billing details and feedback) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.

3. Select “Look-up relationship” as data type and click Next.
4. Select the related object “Service records” and click next.
5. Next >> Next >> Save & new.

ACTIVITY 3: Creation of Checkbox Fields

Creation of Checkbox Field on Appointment Object:

1. Go to setup >> click on Object Manager >> type object name (Appointment) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select “Check box” as data type and click Next.

4. Give the Field Label: Maintenance service
5. Field Name: is auto populated
6. Default value: unchecked

6. click “Check Syntax”.
7. Click next >> next >> Save.

MILESTONE 5: VALIDATION RULE

ACTIVITY 1: To create a validation rule to an Appointment Object

1. Go to the setup page >> click on object manager >> From drop down click edit for Appointment object.
2. Click on the validation rule >> click New.

3. Enter the Rule name as "Vehicle".
4. Insert the Error Condition Formula as: -

NOT (REGEX (Vehicle_number_plate__c , "[A-Z]{2}[0-9]{2}[A-Z]{2}[0-9]{4}"))

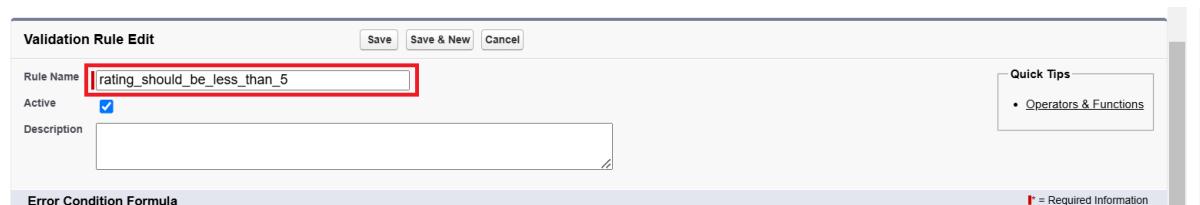

5. Enter the Error Message as "Please enter valid number", select the Error location as Field and select the field as "Vehicle number plate", and click Save.

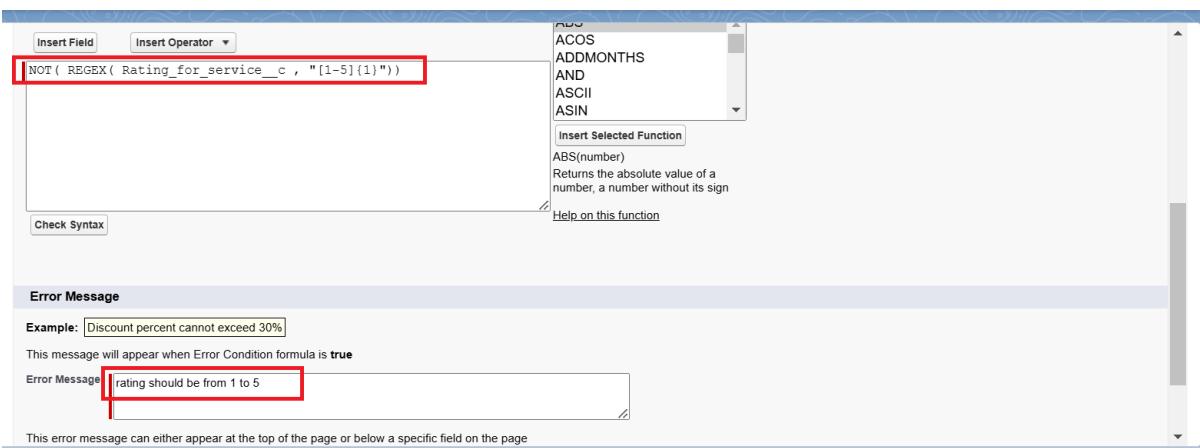

ACTIVITY 2: To create a validation rule to an Billing details and feedback Object

1. Go to the setup page >> click on object manager >> From drop down click edit for Billing details and feedback object.
2. Click on the validation rule >> click New.
3. Enter the Rule name as “rating_should_be_less_than_5”.
4. Insert the Error Condition Formula as: -

NOT (REGEX (Rating_for_service__c , "[1-5]{1}"))

5. Enter the Error Message as “rating should be from 1 to 5”, select the Error location as Field and select the field as “Rating for Service”, and click Save.

MILESTONE 6:DUPLICATE RULE

ACTIVITY 1: To create a matching rule to an Customer details Object

1. Go to quick find box in setup and search for matching Rule.
2. Click on matching rule >> click on New Rule.

The screenshot shows the Salesforce Setup interface. In the top left, there's a 'Setup' button, a 'Home' button, and an 'Object Manager' dropdown. Below that is a search bar with 'matching' typed in. On the left, there's a sidebar with 'Data' and 'Duplicate Management' sections, and 'Matching Rules' is currently selected. The main content area is titled 'Matching Rules' and shows a table of 'All Matching Rules'. The table has columns for Action, Rule Name, Object, Status, Description, Last Modified Date, and Last Modified By. A green arrow points to the 'New Rule' button at the top right of the table. At the bottom of the page, there's a navigation bar with links for A through Z and 'Other'.

3. Select the object as Customer details and click Next.

The screenshot shows the 'New Matching Rule' wizard. The title is 'Matching Rule' and the sub-section is 'New Matching Rule'. It's labeled 'Step 1: Select object'. There's a note: 'Select the object to which this matching rule applies.' Below it is a dropdown menu labeled 'Object' with 'Customer Details' selected. A green arrow points to this dropdown. At the bottom right of the screen, there are 'Next' and 'Cancel' buttons.

4. Give the Rule name: Matching customer details
5. Unique name: is auto populated
6. Define the matching criteria as
7. Field & Matching Method
 1. Gmail Exact
 2. Phone Number Exact
8. Click save.
9. After Saving Click on Activate.

ACTIVITY 2: To create a Duplicate rule to an Customer details Object

1. Go to quick find box in setup and search for Duplicate rules.
2. Click on Duplicate rule >> click on New Rule >> select customer details object.

Q: Duplic Help for this Page ?

DUPLEX Duplicate Rules

All Duplicate Rules

What Are Duplicate Rules? [Expand]

View: All Duplicate Rules

Rule Name	Description	Matching Rule	Active	Last Modified By	Last Modified Date
Customer Detail duplicate		matching Customer details	<input type="checkbox"/>	r2	10/10/2023
Standard Account Duplicate Rule	Identify accounts that duplicate other accounts.	Standard Account Matching Rule	<input checked="" type="checkbox"/>	r2	24/09/2023
Standard Contact Duplicate Rule	Identify contacts that duplicate other contacts and leads.	Standard Contact Matching Rule	<input checked="" type="checkbox"/>	r2	24/09/2023
Standard Lead Duplicate Rule	Identify leads that duplicate other leads and contacts.	Standard Lead Matching Rule	<input checked="" type="checkbox"/>	r2	24/09/2023

3. Give the Rule name as: Customer Detail duplicate
4. Scroll a little in Matching rule section
5. Select the matching rule: Matching customer details

6. And Click on save.
7. After saving the Duplicate Rule, Click on Activate.

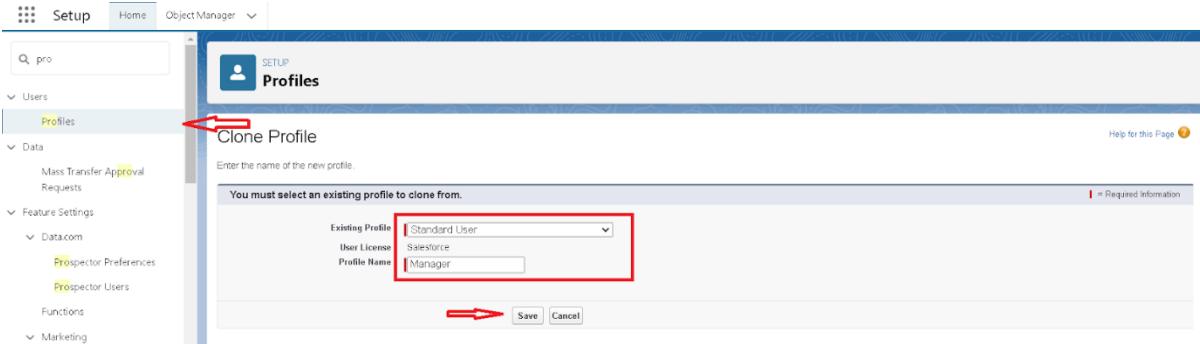

The screenshot shows the 'Edit Duplicate Rule' page for 'Customer Detail duplicate'. The 'Rule Details' section includes a 'Rule Name' field set to 'Customer Detail duplicate' (with a green arrow pointing to it), a 'Description' field, an 'Object' field set to 'Customer Details', and a 'Record-Level Security' section with a radio button selected for 'Enforce sharing rules'. The 'Actions' section defines actions for 'Action On Create' (Allow, Alert checked, Report unchecked) and 'Action On Edit' (Allow, Alert unchecked, Report unchecked). An 'Alert Text' field contains the message 'Use one of these records?'. The 'Matching Rules' section shows a matching rule for 'Customer Details' using the 'Matching Customer details' criteria. The 'Conditions' section displays five empty condition rows under the heading 'Field Operator Value AND'. At the bottom, there are 'Save', 'Save & New', and 'Cancel' buttons, with a green arrow pointing to the 'Save' button.

MILESTONE 8:PROFILE

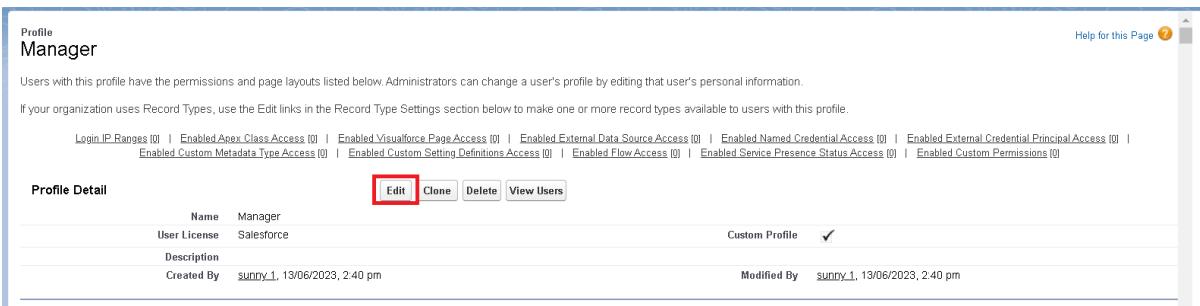

ACTIVITY 1:MANAGER PROFILE

To create a new profile:

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User) >> enter profile name (Manager) >> Save.

2. While still on the profile page, then click Edit.

3. Select the Custom App settings as default for the Garage management.

4. Scroll down to Custom Object Permissions and Give access permissions for Appointments,Billing details and feedback , service records and customer details objects as mentioned in the below diagram.

Custom Object Permissions						
	Basic Access			Data Administration		
	Read	Create	Edit	Delete	View All	Modify All
Appointments	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Billing details and feedback	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Customer Details	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

5. And click save.

MILESTONE 9: Role & Role Hierarchy

ACTIVITY 1:CREATING MANAGER ROLES

Creating Manager Role:

1. Go to quick find >> Search for Roles >> click on set up roles.

The screenshot shows the Salesforce Setup interface with the 'Roles' page selected. The sidebar on the left has 'Users' expanded, with 'Roles' highlighted by a red box. A sample role hierarchy diagram is shown, illustrating the structure from 'Executive Staff' down to 'International Sales Rep'. At the bottom right of the page, there is a red box around the 'Set Up Roles' button.

2. Click on Expand All and click on add role under whom this role works.

- Give Label as “Manager” and Role name gets auto populated. Then click on Save.

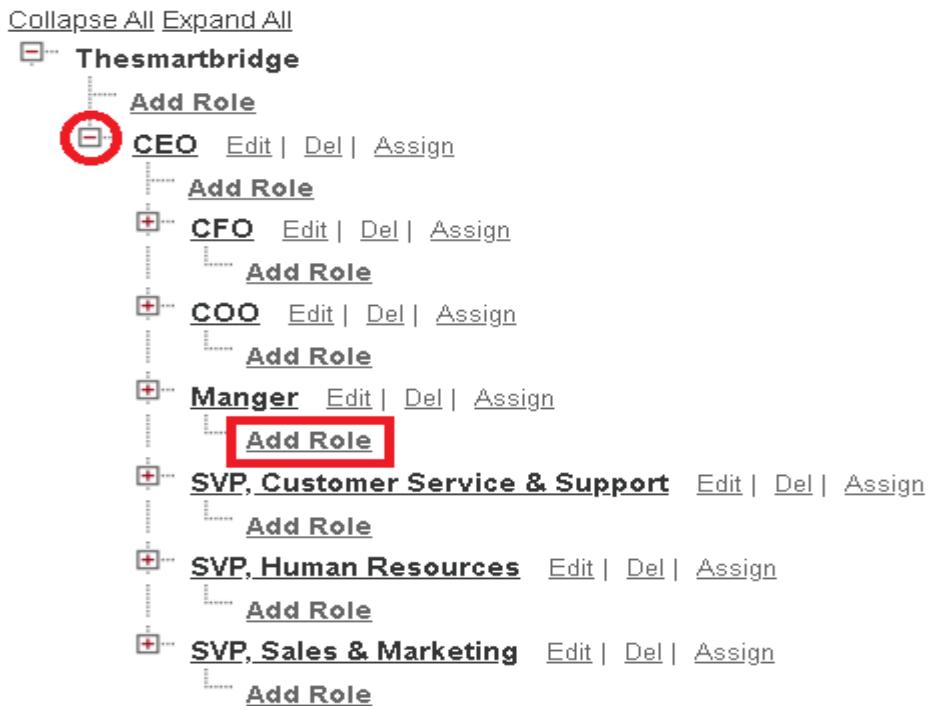

Role Edit

Label	Manger	
Role Name	Manger	
This role reports to	CEO	
Role Name as displayed on reports		
<input type="button" value="Save"/> <input type="button" value="Save & New"/> <input type="button" value="Cancel"/>		

ACTIVITY 2: CREATING ANOTHER ROLES

Creating another two roles under manager

- Go to quick find >> Search for Roles >> click on set up roles.
- Click plus on CEO role, and click add role under manager.

3. Give Label as “sales person” and Role name gets auto populated. Then click on Save.

MILESTONE 10:USERS

ACTIVITY 1: CREATE USER

1. Go to setup >> type users in quick find box >> select users >> click New user.
2. Fill in the fields
 1. First Name: Niklaus
 2. Last Name: Mikaelson
 3. Alias: Give a Alias Name
 4. Email id: Give your Personal Email id
 5. Username: Username should be in this form: text@text.text
 6. Nick Name: Give a Nickname
 7. Role: Manager
 8. User licence: Salesforce
 9. Profiles: Manager

3. Save.

ACTIVITY 2: CREATING ANOTHER USERS

1. Repeat the steps and create another user using
 1. Role: sales person
 2. User licence: Salesforce Platform
 3. Profile: sales person

Note: create atleast 3 users with these permissions.

MILESTONE 11: PUBLIC USERS

ACTIVITY: CREATING NEW PUBLIC GROUP

1. Repeat the steps and create another user using
 1. Role: sales person
 2. User licence: Salesforce Platform
 3. Profile: sales person

Note: create atleast 3 users with these permissions.

MILESTONE 12: SHARING SETTING

ACTIVITY: CREATING SHARING SETTING

1. Go to setup >> type users in quick find box >> select Sharing Settings >> click Edit.
2. Change the OWD setting of the Service records Object to private as shown in fig.

2. Select the Record-triggered flow and Click on Create.

New Flow

Core All + Templates

- Screen Flow
- Record-Triggered Flow
- Schedule-Triggered Flow
- Platform Event—Triggered Flow
- Autolaunched Flow (No Trigger)
- Record-Triggered Orchestration

3. Select the Object as “Billing details and feedback” in the Drop down list.
4. Select the Trigger Flow when: “A record is Created or Updated”.
5. Select the Optimize the flow for: “Actions and Related Records” and Click on Done.

Configure Start

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

*Object
Billing details and feedback

Configure Trigger

*Trigger the Flow When:
 A record is created
 A record is updated
 A record is created or updated
 A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements
None

***Optimize the Flow for:**

Fast Field Updates

Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

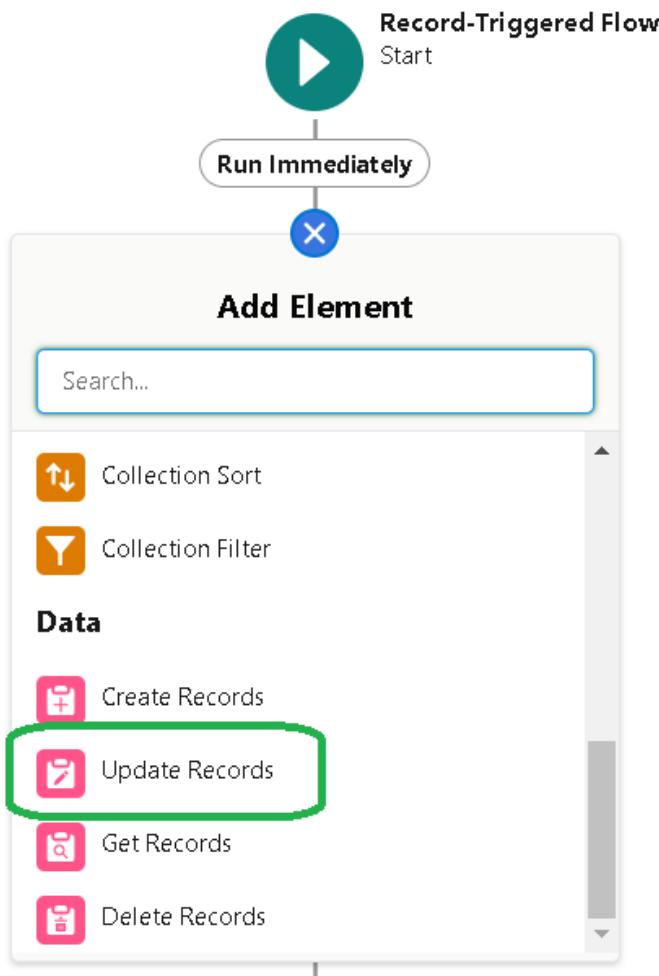

Actions and Related Records

Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed

Cancel Done

6. Under the Record-triggered Flow Click on “+” Symbol and In the Drop down List select the “Update records Element”.

7. Give the Label Name: Amount Update
8. Api name: is auto populated

Edit Update Records

Update Salesforce records using values from the flow.

*Label *API Name

Amount Update	Amount_Update
---------------	---------------

Description

*** How to Find Records to Update and Set Their Values**

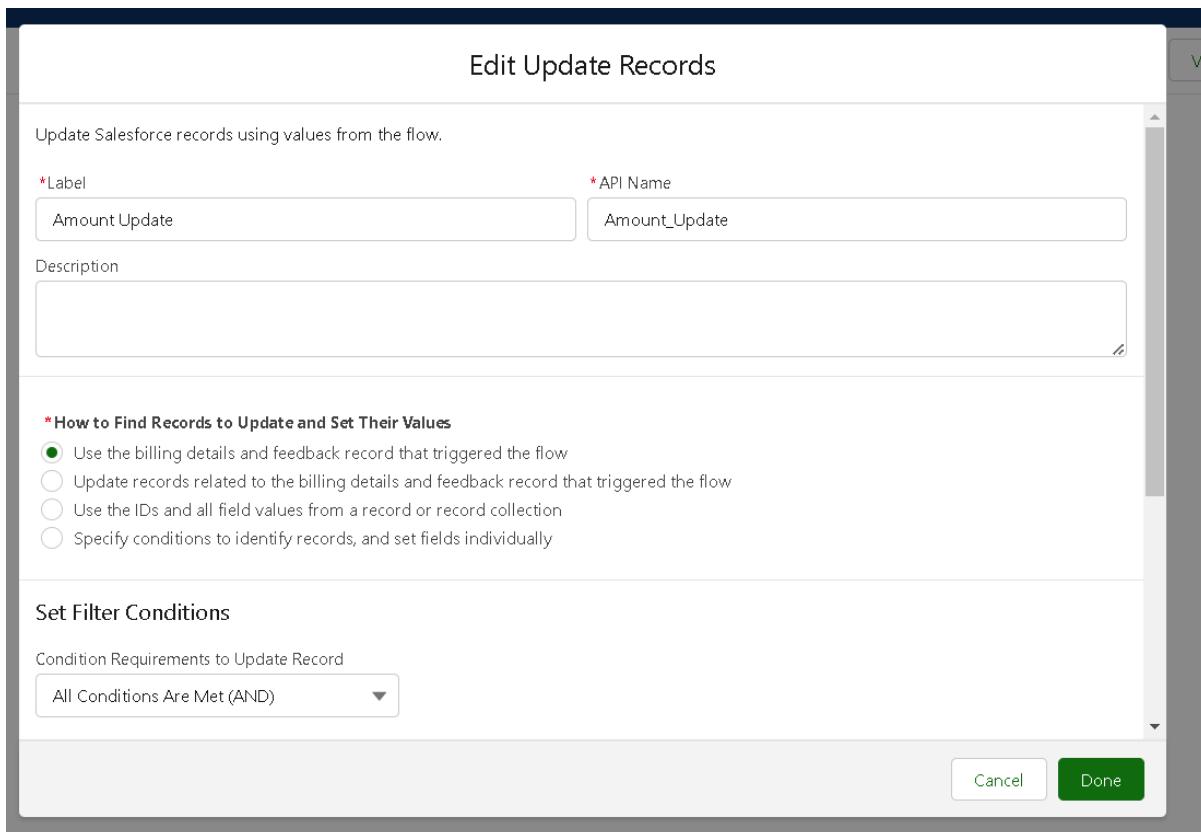

- Use the billing details and feedback record that triggered the flow
- Update records related to the billing details and feedback record that triggered the flow
- Use the IDs and all field values from a record or record collection
- Specify conditions to identify records, and set fields individually

Step 2. Define Report Records Set

This report type will generate reports about Customer Details. You may define which related records from other objects are returned in report results by choosing a relationship to another object.

A Customer Details

Primary Object

B Appointments

A to B Relationship:

- Each "A" record must have at least one related "B" record.
- "A" records may or may not have related "B" records.

(Click to relate another object)

11. Again Click to relate another object.
12. And select the related object as “service records”.
13. Repeat the process and select the related object as “Billing details and feedback”.
14. And click on save.

SETUP Report Types

This report type will generate reports about Customer Details. You may define which related records from other objects are returned in report results by choosing a relationship to another object.

A Customer Details

Primary Object

B Appointments

A to B Relationship:

- Each "A" record must have at least one related "B" record.
- "A" records may or may not have related "B" records.

C Service records

B to C Relationship:

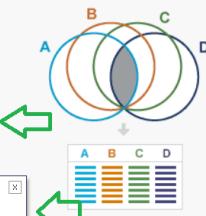

- Each "B" record must have at least one related "C" record.

ACTIVITY 4:CREATE REPORT

Note: Before creating report, create latest “10” records in every object.

Try to fill every field in each record for better experience.

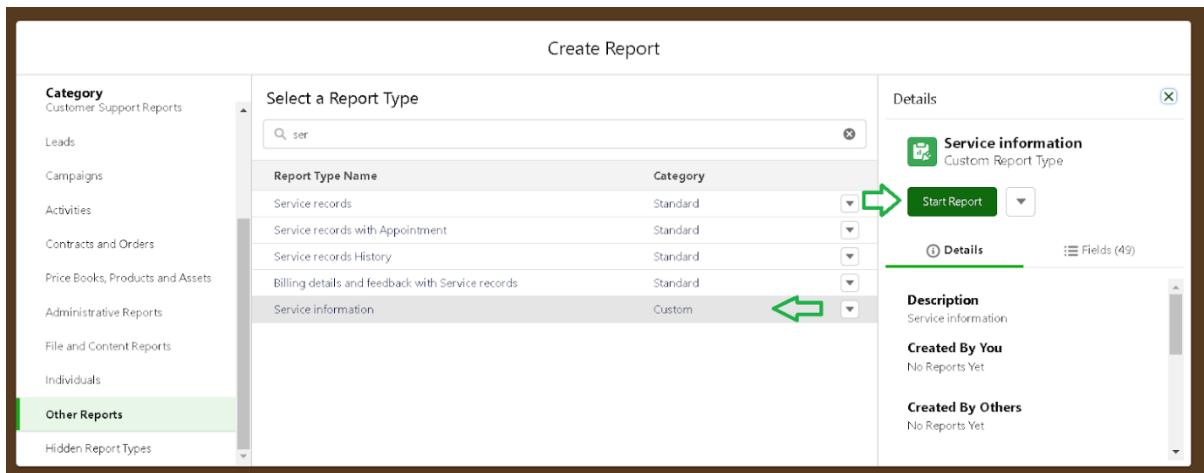

1. Go to the app >> click on the reports tab

2. Click New Report.

The screenshot shows the 'Employee Manage...' application. The top navigation bar includes 'Home', 'Employees', 'Assets', 'Asset Services', 'Projects', 'ProjectTasks', 'Reports' (which is highlighted with a red box), and 'Dashboards'. Below the navigation is a search bar and a toolbar with icons for star, plus, question mark, gear, and user. The main area is titled 'Reports' and shows a table of 'Recent' reports. The table has columns for 'Report Name', 'Description', 'Folder', 'Created By', 'Created On', and 'Subscribed'. Two reports are listed: 'Employee's working on projects report' and 'Assets assigned to Employees'. A sidebar on the left lists categories: 'Recent', 'Created by Me', 'Private Reports', 'Public Reports', and 'All Reports'. At the bottom left is a 'FOLDERS' section.

3. Select the Category as other reports, search for Service Information, select that report, click on it. And click on start report.

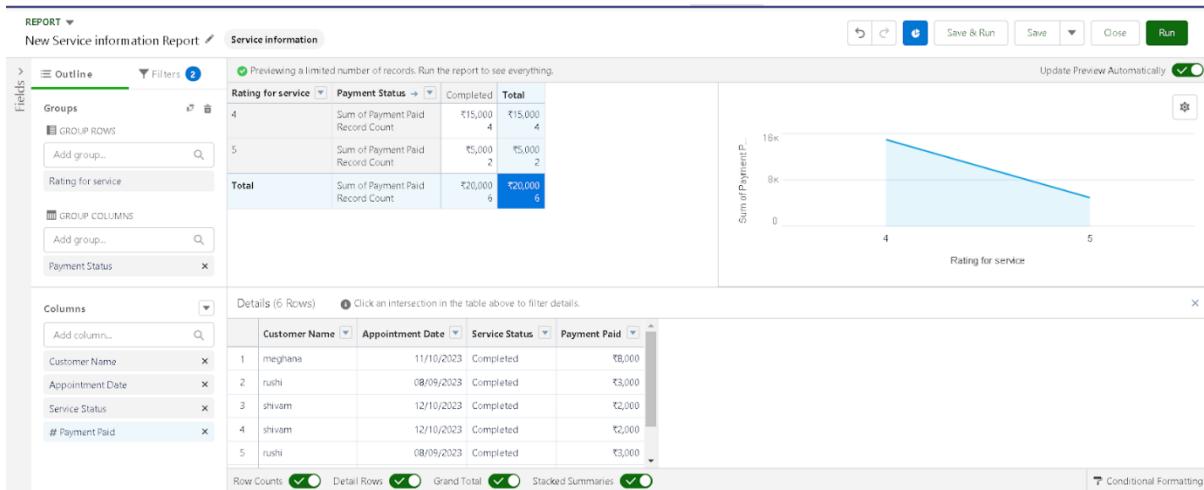

The screenshot shows the 'Create Report' dialog. On the left is a sidebar with a tree view of 'Category' sections: Customer Support Reports, Leads, Campaigns, Activities, Contracts and Orders, Price Books, Products and Assets, Administrative Reports, File and Content Reports, Individuals, Other Reports (which is selected and highlighted in green), and Hidden Report Types. The main area is titled 'Select a Report Type' and contains a search bar and a list of report types. The 'Service information' report type is selected and highlighted with a green arrow. To the right is a 'Details' panel for the selected report type, which includes a 'Start Report' button (also highlighted with a green arrow) and sections for 'Description', 'Created By You', and 'Created By Others'.

4. Their outline pane is opened already, select the fields that mentioned below in column section.

1. Customer name
2. Appointment Date
3. Service Status

4. Payment paid
5. Remove the unnecessary fields.
6. Select the fields that mentioned below in GROUP ROWS section.
 1. Rating for Service
7. Select the fields that mentioned below in GROUP ROWS section.
 1. Payment Status
8. Click on Add Chart , Select the Line Chart.
9. Click on save, Give the report Name: New Service information Report
10. Report unique Name is auto populated.
11. Select the folder the created and Click on save.

4. Open the record and click on Quality check status as true.
5. Click on save.
6. Now automatically Service status will be moved to completed.

CONCLUSION

The Garage Management System provides an efficient and organized solution for managing day-to-day operations of a garage, including customer records, vehicle details, job assignments, billing, and inventory tracking. By automating manual tasks, the system reduces human errors, saves time, and improves overall productivity. It enhances customer satisfaction through quick service tracking, accurate billing, and transparent communication.

In addition, the system supports better decision-making by generating useful reports and maintaining historical data for future reference. With scalability and adaptability, it can be further enhanced to integrate with online booking, digital payments, and mobile applications.

Overall, the Garage Management System simplifies operations, improves accuracy, and ensures smooth functioning, making it a valuable tool for modern garage businesses.
